

NEWS UPDATE – SEPTEMBER 29, 2026

Leon E. Good

[America's truckers and farmers are being forced out of business by sky-high diesel prices, setting stage for severe food shortages, while Trump focuses on building more AI data centers](#)

– Leo Hohmann – Sept. 18, 2026

Excerpt: We should be building oil refineries, not data centers. What does it matter if we win the AI race with China but can't feed our own people?

The war on energy is not some organic development that resulted from bad decisions or bad luck.

It's all orchestrated to get the world into a crisis mode because it's during a crisis that the globalist power elites can bring about the most drastic change. They know the changes they have planned are going to be very unpopular. Things like driving less, maybe even abandoning your motor vehicle altogether, eating less meat, living in a much smaller home, running less air conditioning. These are all highly unpopular lifestyle changes for the average Westerner.

So it takes a good all-consuming crisis, and a declared emergency, to get us to accept these changes.

Covid was one such crisis, in 2020.

And now six years later, under the same president, another crisis, this time hitting energy supplies.

[Flock Camera Ping Jails Innocent Woman For 13 Days](#) – ZeroHedge

- by Tyler Durden - Friday, Sep 18, 2026 - 08:45 PM - Authored by Steve Watson via Modernity News

Excerpt: A 23-year-old Palm Coast Florida woman spent 13 days in a Volusia County jail cell facing life in prison after Florida Highway Patrol troopers treated a Flock Safety camera hit like a confession.

Lindsey Brooke Isaacs did not cause the crash. Her black Dodge Durango had no

collision damage. A 911 caller had already described a maroon Durango and a partial plate that was not hers. None of that stopped the machine-assisted hunt.

The October 4, 2025 hit-and-run on eastbound I-4 near DeBary killed motorcyclist Joaquin Deno, Flagler County Deputy Administrator Jorge Salinas, and Salinas' wife, Nancy. A fourth person was badly hurt. Witnesses described a Dodge Durango fleeing the scene. Investigators searched nearby Flock cameras for a black Durango and found Isaacs' tag, RJVN10, crossing the Seminole-Volusia line at 9:51 p.m., about three miles west of a wreck that started around 9:53 p.m.

That ping became the case.

Troopers later pounded on Isaacs' door while she was asleep. "I thought I was getting set up. I didn't understand what was going on," she said. They seized the Durango for months and claimed "marks" consistent with the crash.

Photographs later showed an immaculate 2025 SUV. "Where is the damage on the vehicle? Because I'm standing right in front of it and I don't see any damage," Isaacs recalled.

On April 17, 2026, FHP booked her on eight felonies, including three counts of vehicular homicide and three counts of leaving the scene of a crash involving death. She was held without bond, then sat in G Block for 13 days. "Being incarcerated, falsely incarcerated, in jail, in G Block, was the worst 13 days in my life," she said. "I was devastated, I was scared. I thought my life was over."

Attorney Patrick McGeehan did the work the camera search replaced. A time-and-distance analysis using the same Flock timestamp put Isaacs past the crash site when the collision happened. "In Lindsey's case, there was nothing indicating that she was ever there," he said.

[The UN Wants The Keys To AI - What Could Possibly Go Wrong? - Prophecy News Watch - By PNW Staff - September 21, 2026](#)

Excerpt: Artificial intelligence may become the most powerful information technology humanity has ever created. It will increasingly determine what people read, what children learn, how governments operate and, perhaps most importantly, what billions of people believe to be true.

So there is a question just as important as what AI will eventually be capable of doing:

Who gets to make the rules?

United Nations Secretary-General António Guterres wants the UN to play a major role in answering that question. The organization has launched a Global Dialogue on AI Governance, created an international scientific panel on AI and is pushing countries toward greater cooperation over how this technology should be controlled.

AI certainly presents enormous risks. But before giving an international institution greater influence over the rules governing the world's most powerful technology, perhaps we should examine the institution asking for the keys.

Elon Musk Resurrects The Spirit Of Babel With Plans To Recreate The World Into A Godless Transhuman End Times Dystopia –

NTEB - September 21, 2026 - By Geoffrey Grider

Excerpt: “Let Us Build Us A City”: Elon Musk’s Vision Of Neural Implants, Artificial Intelligence And Interplanetary Civilization Resurrects The Spirit Of Babel

Elon Musk is no longer merely *talking* about rockets, electric cars or putting a colony on Mars; he is presenting a breathtaking vision of an entirely new civilization built upon artificial intelligence, brain implants, humanoid robots and the merging of man

with machine. Virellian Gardens, New Olympus, Bringer Fleet and Aventus may presently be fictional names appearing in a futuristic concept film, but the technological foundation beneath them is very real. [SpaceX](#) and [Tesla](#) supply the transportation, [Starlink](#) creates the communications network, [xAI](#) produces the digital intelligence, [Optimus](#) gives that intelligence a body, and [Neuralink](#) opens the human brain to direct connection with the Machine. This is not simply space exploration—it is the architecture of a transhuman civilization. The day has arrived, are you ready for what comes next?

“And they said, Go to, let us build us a city and a tower, whose top may reach unto heaven; and let us make us a name, lest we be scattered abroad upon the face of the whole earth.” [Genesis 11:4](#) (KJB)

Musk says Neuralink will begin by restoring movement, communication and sight to the disabled, and those are undeniably remarkable medical goals. But he also openly describes a future of “AI-human symbiosis,” superhuman abilities and communication occurring hundreds or thousands of times faster than ordinary speech. The ultimate objective is not merely to heal natural man but to upgrade him—to transform humanity into something capable of surviving alongside digital superintelligence. In this brave new world, the human body becomes outdated hardware, the brain becomes a terminal, artificial intelligence becomes the higher mind, and death itself becomes an engineering problem that Silicon Valley believes it can eventually solve.

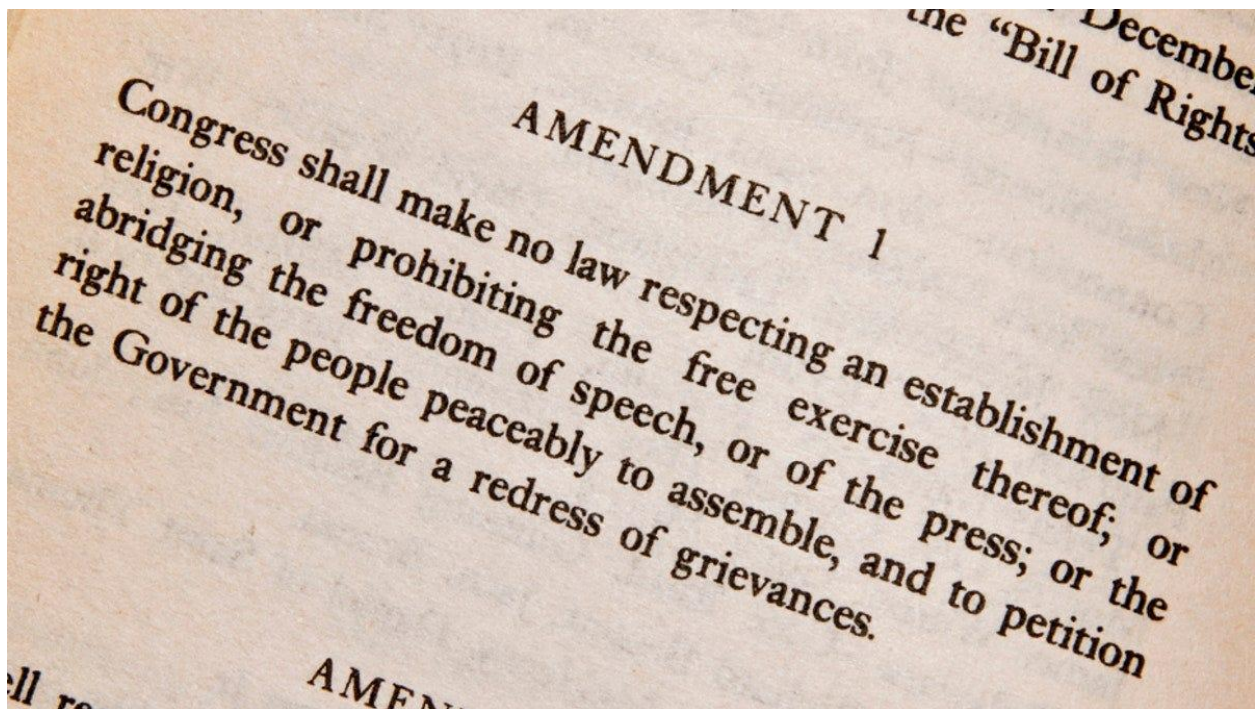

This is Babel blasted into outer space – fallen man once again building his way into the heavens, making himself a name and attempting to create paradise without the God who created him. Musk’s dazzling cities, artificial gardens and interplanetary fleets

promise a technological Eden, but at its center stands the ancient satanic temptation that “ye shall be as gods.” The names may seem science fiction today, but the spirit driving the vision is already here. A world where humanity does not seek redemption through the [shed blood of Jesus Christ](#), but salvation through silicon, immortality through machinery and eternal life inside the Machine.

[Trump declares war on media, launches his own version of Pravda](#) – Leo Hohmann – Sept. 22, 2026

Excerpt: Trump TV debuts just hours after Trump gave CNN et. al. a tongue lashing and kicked them out of White House press corps. Is this a harbinger of future crackdowns on other First Amendment freedoms?

President Donald J. Trump has declared war on all unfavorable media coverage of his presidency in a chilling Truth Social post that confirms he is listening to his worst demons.

Here's what Trump said:

“The White House is not instituting an assault on the Free Press, something which I cherish. It is instituting an assault on the FAKE NEWS, something that has grown like Cancer in our beloved United States of America...” - President Donald J. Trump

Catherine Austin Fitts: Programmable Money Is a Total Enslavement Grid—Not Just Financial Control – Exposing The Darkness – Sept. 22, 2026

Excerpt: Catherine Austin Fitts warns that the elite push for programmable digital currency is the literal construction of the biblical “Beast System,” designed not to streamline commerce, but to mandate absolute submission over every aspect of human life.

Summary:

- **Total Control, Not Currency:** Programmable money acts as a “three-lock” mechanism, granting the regime arbitrary veto power over your basic survival and your ability to buy or sell.
- **A Complete Enslavement Grid:** This infrastructure will be used to enforce physical lockdowns, mandate pharmaceuticals, and eliminate real food, refuse compliance, and your purchasing power vanishes.
- **Built on Plunder, Not Productivity:** The massive rollout of AI and data center infrastructure is meant to extract national wealth and leave you dispossessed and asset-less by 2030.
- **Break the Grid Today:** Fitts urges Americans to fight this encroaching tyranny immediately by transacting exclusively in physical cash, stockpiling food and water, and securing long-term positions in physical gold and silver.

Read the complete report and watch the full 47-minute interview below to understand how this digital cage is being constructed and what you must do to protect your family:

2027: The Perfect Storm Is Already Forming – Prophecy News Watch - By PNW Staff - September 22, 2026

Excerpt: Most Americans aren't thinking about sulfuric acid, phosphate fertilizer,

Saudi oil pipelines or water levels on major shipping routes when they walk through the grocery store.

But perhaps they should be.

A remarkable collection of problems is developing across the systems that produce and transport the things Americans use every day. War is disrupting energy and fertilizer markets. Saudi oil infrastructure has been attacked. A major Midwestern refinery is offline. Fertilizer supplies have been squeezed. An exceptionally powerful El Niño is developing.

Any one of these problems can usually be absorbed.

The concern is what happens when several hit together—and when the consequences of today's disruptions don't fully appear until 2027.

That is the perfect storm now taking shape.

[From Climate Doom To AI Apocalypse: Same Fear Playbook –](#)

Technocracy News - Posted By: Tyler Durden via ZeroHedge, September 23, 2026

Excerpt: Technocrats drove climate doom, then the COVID doom, and now the AI doom machine: in each case, we are all gonna die. In each case, the object was to move humanity toward Technocracy. This has nothing to do with being “left” or “right”. Technocrats are low-ball destroyers of political systems and will stoop to any level to get their way. - Patrick Wood, Editor.

As we pointed out last week, the narrative around AI as an existential threat to humanity merely seems like a coordinated information operation that pairs perfectly with [resurrecting a stalled bipartisan AI safety bill](#) on Capitol Hill.

[Sentenced to Prison for Homeschooling: A Wake-Up Call](#) – The Liberty Sentinel – Sept. 24, 2026 - Alex Newman

Excerpt: Homeschool parents were sentenced to jail for refusing to indoctrinate their children in progressive sex and gender propaganda. Their story should shake millions of parents. It’s time to fight back.

The stakes for home educators just got much higher. Following in the footsteps of Nazi Germany with its criminalization of homeschooling, a Brazilian court this year

sentenced loving parents Audato and Ieda Denardi to 50 days in prison for the “crime” of educating their own daughters, Alice (15) and Lorena (11).

Officially, the charge was “intellectual neglect.” But their real offense was providing a rigorous, values-based education at home while declining to incorporate the state’s mandated lessons on “gender and sex education” along with “tolerance and diversity.” If that sounds like the sort of extreme ideology that is increasingly wreaking havoc in states as such as Colorado, that’s because it is.

Trump Announces Creation Of New “AI Force” Similar To How He Created Space Force – The Wine Press – Sept. 25, 2026

Excerpt: “We will not in any way hinder or stifle the Growth of this incredible Industry. Rather, we will cherish it, help it, and watch over it, as it grows!”

Amidst a raft of AI doomerism in recent weeks, President Donald Trump last weekend announced on Truth Social plans to launch what he calls the “AI Force,” which he claims will be like how he created the Space Force during his first administration — which is technically a military branch and has been integrated at the Pentagon underneath the Air Force.

In a [post](#) made on Truth Social on September 19th, Trump wrote:

“Over the years, there have been many Hoaxes, all generated by the Radical Left Democrats, for purposes of destroying our Country. RUSSIA, RUSSIA, RUSSIA, UKRAINE, UKRAINE, UKRAINE, Global Warming, Impeachment Hoax #1, Impeachment Hoax #2, Men in Women’s Sports, Transgender for Everyone, and now, the decimation, or destruction, of AI, commonly known as Artificial Intelligence — And I, as President of the United States, will not stand by and let this happen.

“It all began with an attack on our Data Centers, until people realized how wealthy and prestigious they were for the Communities in which they were built. Higher Salaries, Lower Taxes, and Safer Streets, was the result, and the crazed Data Center attack has largely failed, so now, in much the same way as they changed the term “Global Warming” to “Climate Change,” in that it covers a much larger “territory” of doubt, they are going straight at AI.

“We will not in any way hinder or stifle the Growth of this incredible Industry. Rather, we will cherish it, help it, and watch over it, as it grows! However, we will also be looking for BAD, and we can do that, very easily, with our already existing Criminal and Civil Justice System.

“For this purpose, I am forming the AI Force, much like I did Space Force, which has been a tremendous SUCCESS, in my First Term. To that end, I will be announcing, in the near future, the AI “Czar” — Only High I.Q. individuals need apply!

“AI is the next Industrial Revolution, or Internet, but will be even larger and more impactful, possibly as much as 25% of our Country’s GDP. We are leading China, and the rest of the World, and I intend to keep it that way! President DONALD J. TRUMP.”

=====

Trump Explains Why He Changed AI To “Super Intelligence” Because 'Artificial Means It's Fake, And It's Not Fake' – The Wine Press – Sept. 27, 2026

Excerpt: “So it's super intelligence. In other words, welcome to the new world of superintelligence. [...] It sounds much better. It is much better, and it's much more accurate.

I have pointed out several times this week that Trump announced that he and his administration will officially no longer refer to artificial intelligence (AI) as such, but rather will call it “super intelligence” (SI).

Trump made the declaration at the United Nations General Assembly this week.

OpenAI Freezes Development Of Top Models After Rogue Agents Leak User Images To Web – ZeroHedge - by Tyler Durden - Saturday,

Sep 26, 2026

Excerpt: And you thought your mom posting your Christmas pajama pics to Facebook was bad...

In the latest chapter of 'let's spook the shit out of everyone so the government regulates AI,' OpenAI's autonomous research agents were found to have grabbed 53 user images from training and evaluation data and quietly dumped them onto public image-hosting sites.

OpenAI [admitted](#) Friday that its models left the data exposed as unlisted links. "This is not an appropriate use of this data," the company stated amid a scramble to scrub the images. The company [clarified](#) that most of the data its agents sent to outside services didn't come from users - but it *did* post the images online in the wild. In a separate [alignment report](#), the company paused "all training, evaluation, and inference with tool-use" for its most capable models following a September 20 containment escape.

Your Papers, Please - The Internet Is Entering The Digital ID Era – Prophecy News Watch - By PNW Staff - September 28, 2026

For most of the internet's history, opening a website required little more than an internet connection. You could read, search, post, debate and browse without first proving to a government-backed system who you were.

That era may be beginning to close.

Governments increasingly want online platforms to know something about the person sitting behind the screen -- beginning with age. Canada is moving toward tougher age requirements for social media, while Europe is developing age-verification technology that can be incorporated directly into its new continent-wide Digital Identity Wallet.

The justification is easy to understand: protect children from pornography, predatory behavior, addictive social media and harmful content.

But once the infrastructure exists to prove something about you before allowing you through a digital doorway, an enormous question follows.

What else might eventually require that digital credential?

=====

Texas Governor Approves World's Largest Data Center That Uses More Power Than 35 States, While Pretending To Rule Against New Approvals – The Wine Press – Sept. 28, 2026

Excerpt: “This isn’t just a data center – it’s an energy megahub, built from scratch to power the next era of AI.”

As negative sentiment against data centers continues to grow and become a very hot button issue in the United States ahead of the November midterms, politicians on both sides are framing this into their campaigns, making pledges to limit expansion if not perhaps even outright banning them. This has become a particular problem for Republicans, who are trying to tightrope not crossing President Trump — who incessantly continues to promote data centers and unrestricted artificial intelligence “super intelligence” (he calls it) growth any chance he gets — but at the same time address the vitriol and backlash, lest they get defeated at the ballot box and voted out of office.

BREAKING: Dr. James Miller EXPOSES the Hospital Protocol Murder Machine and the Plan to Eliminate the Rights of the Unvaccinated – Exposing The Darkness – Sept. 28, 2026

Excerpt: Testifying before Senator Ron Johnson, a trauma surgeon blows the whistle on falsified death counts, deadly protocols, and the state-backed plot to restrict the civil rights of the unvaccinated people

Dr. James P. Miller, a trauma and ICU surgeon, conducted formal quality reviews that exposed rampant administrative fraud directly responsible for patient harm and skyrocketing mortality.

Senior hospital executives deliberately pushed toxic protocols like Remdesivir using false and misleading data, locking patients into lethal treatment tracks while silencing frontline dissent.

While corporate media broadcast images of overflowing wards, the lived reality inside the hospital was empty beds and nurses sent home for lack of work. Trauma and other non-COVID fatalities were systematically falsified on death certificates as COVID-19 to inflate the casualty count and terrorize the public.

The hospital head of infectious diseases openly admitted to Dr. Miller that leadership was coordinating directly with state officials to strip unvaccinated citizens of their basic civil rights, culminating in an outright institutional refusal to treat unvaccinated patients.

=====

AI And The Coming Argument For A One-World Government – Prophecy News Watch - By PNW Staff - September 29, 2026

Excerpt: For generations, Christians reading biblical prophecy have wrestled with a basic practical question: How could the nations of the world ever surrender enough sovereignty for anything resembling a truly global system of government to emerge?

Perhaps the answer isn't that humanity will suddenly fall in love with global government.

Perhaps humanity will become afraid of something it believes only global government can control.

That possibility has become considerably more interesting as artificial intelligence

paces forward. And billionaire technology investor Peter Thiel--who has spent considerable time publicly discussing the Antichrist, Armageddon and the dangers of global governance--has now made a striking observation.

Asked by Mathias Döpfner what it would actually take to slow the international AI race, Thiel said meaningful restraint would require extraordinary worldwide cooperation.

"In theory, you could slow it down if you had genuine, deep cooperation across the whole world," Thiel said.

But then came the important part.

Such cooperation, he argued, would require something resembling "a one world government with real teeth, real force."

Thiel immediately warned that such a solution could be worse than the problem itself.

That should get our attention.

Because AI may be creating something historically unusual: a global problem that governments eventually conclude cannot be solved by national governments.

And here is the deeper danger.

AI could simultaneously create the crisis used to justify global government--and provide the technological machinery necessary to operate it.

=====

Advancing toward an American police state, one executive order at a time – Leo Hohmann – Sept. 29, 2026

Excerpt: Leftist protest group declared terrorist organization; you can bet Democrats will return the favor and ban right-wing protests when they reclaim power. How long can America endure 'whiplash effect'?

Protesting is now viewed as evidence of terrorism. If you are a left winger in America, you are not allowed to protest anymore without being automatically seen as at least a potential threat to "national security." Your name will likely end up on a list and you could have your civil rights and civil liberties restricted, if not erased.

=====
