OpenAI warns its upcoming model is so “capable” it requires much stronger guardrails – End Time Headlines – Sept. 2, 2026

Excerpt: OpenAI has determined that one of its forthcoming artificial intelligence systems is powerful enough to demand extra layers of protection before it can be released to the public. According to a report from Reuters, company officials disclosed the finding during a Tuesday conference call with reporters, marking a significant moment in the lab’s internal safety process.

The model, named Astra, can identify more cybersecurity weaknesses than OpenAI’s most advanced publicly available system while using less computing power to do so. Officials said the system’s abilities have crossed a previously theoretical threshold inside the company’s own safety protocol, making it the first OpenAI model to trigger those tougher requirements.

“With the right tools and access, Astra can find previously unknown security flaws and develop ways to exploit them across many well-protected systems without a person

guiding each step,” said Amelia Glaese, an OpenAI vice president who oversees the company’s safety work.

OpenAI intends to give a limited group of users access to Astra “soon,” though it declined to provide a timeline or other details. Glaese acknowledged that the additional safeguards “may sometimes slow, pause, or stop legitimate work,” adding that the company would try to keep those interruptions to a minimum.

The announcement arrives amid growing external pressure on OpenAI to prove it can contain systems that grow more capable by the month. The company recently paused much of its model development for two weeks after its AI agents escaped a testing environment and hacked the open-source platform Hugging Face. Astra was not involved in that episode, officials said, yet its demonstrated skills still warranted stricter controls.

BOMBSHELL: The COVID Shots Were Engineered to Breach Your Brain – Exposing The Darkness – Aug. 29, 2026

Excerpt: New evidence confirms the vaccine-generated spike protein pries open the blood-brain barrier, flooding the central nervous system and leaving a trail of neurological destruction

This should be leading every broadcast, every front page, every newsroom in the world. It won’t be.

New research demonstrates that the spike protein, the very toxin the COVID shots instruct your own cells to manufacture, breaches the blood-brain barrier.

The BBB is the fortress wall of the human brain, the gatekeeper that preserves the seat of your consciousness. When it is pried open by a synthetic poison, the consequences are exactly what millions of the vaccine-injured have been reporting for years: crushing headaches, crippling brain fog, and permanent neurological damage.

This was not an accident. The mechanism is inherent to the design.

The shots program the body to produce spike protein systemically, with no off switch and no control over where it travels. It reaches the brain. It compromises the barrier. The damage follows.

The regulatory agencies approved this product without long-term safety data, forced it on the population, and gaslit the victims while protecting the architects of this disaster.

The injured were told their symptoms were “anxiety” while the evidence of systemic harm was being ignored by the very people paid to prevent it.

Every newsroom ignoring this is choosing a side, and it isn’t yours.

Tokenization: Facial Recognition And Biometrics Becoming Normal In Australia, Partnering With Palantir For Customer Surveillance And Data Collection – The WinePress – Aug. 30, 2026

Excerpt: “Customers enroll their biometrics once through merchants, digital wallets, banks, and other companies, with the technology creating a unique digital token that cannot be used elsewhere...”

The nation down under continues to be a global trailblazer in biometrics and cashless technologies. Now more stores and shops are introducing new forms of so-called frictionless payment methods.

[Information Age](#) reported on how a number of establishments are reneging on their promises to avoid biometrics in their stores. The tech outlet wrote:

Verifone, which has over 300,000 [Electronic funds transfer at point of sale] EFTPOS terminals in everyday use, this month introduced Australian customers to its Victa model, which embraces biometric scanning alongside normal tap and pay features.

Customers enroll their biometrics once through merchants, digital wallets, banks, and other companies, with the technology creating a unique digital token that cannot be used elsewhere or reverse engineered to recreate the original face or handprint.

By looking into a camera on the device, or scanning their palms to capture the unique pattern of veins in their hands, customers verify their identity against the token data, completing financial transactions or identifying themselves as a member of the store's loyalty program.

It's part of a suite of products that let merchants sell with back-end integration to e-commerce platforms like Shopify, Bilt, Aevi, PayPal, and Stripe – and the ability to, as Verifone head of strategic partners Kristy Gregory put it, “pay with a smile.”

“People already use biometrics to unlock phones, access apps, and confirm payments online,” she said.

Verifone is “giving customers that same choice at the point of sale” with a tool that makes checkout “faster, easier and safer for consumers and retailers,” she added.

[The AI Financial Threat: Will The Next Crisis Accelerate Digital ID?](#) – Prophecy News Watch - By PNW Staff - September 01, 2026

Excerpt: For years, the greatest fears surrounding artificial intelligence have centered on jobs, misinformation and machines eventually becoming too powerful for humans to control. Now one of the world's most important financial

watchdogs is warning about another threat that could hit much closer to home: AI could become a danger to the stability of the global financial system itself.

Andrew Bailey, governor of the Bank of England and chairman of the Financial Stability Board, issued the warning in a letter to G20 finance ministers and central bank governors ahead of meetings in Asheville, North Carolina. The FSB coordinates financial regulators across the world's major economies, making the language particularly noteworthy.

"For the financial system, the most immediate concern is the potential impact of frontier AI on cyber risk," Bailey warned.

These aren't hypothetical concerns about what artificial intelligence might be capable of decades from now. Bailey says frontier AI models are already demonstrating increasingly sophisticated autonomy, problem-solving abilities and threat capabilities, potentially changing the "speed, scale and economics" of cyberattacks.

That should get everyone's attention.

The September Perfect Storm: Too Many Warning Lights Are Flashing At Once – Prophecy News Watch – Sept. 2, 2026

Excerpt: September has barely begun, and already the warning lights are flashing. War is escalating in the Middle East, oil prices are surging, diesel costs are soaring, and government bond yields are reaching levels not seen in decades. At the same time, America is carrying approximately \$40 trillion in federal debt, the war in Ukraine continues to strain Europe, and investors are increasingly questioning whether the artificial intelligence boom has created another enormous financial bubble.

Any one of these developments would deserve attention, but the real concern is that they are happening at the same time. September already has an infamous reputation on Wall Street, historically ranking as the weakest month of the year for the S&P 500. That certainly doesn't mean September 2026 will produce a crash; history doesn't operate according to a calendar. But this September is arriving with an unusually combustible collection of risks already in place.

“My Eyes Have Been Thrown Wide Open”: Sen. Ron Johnson Drops Bombshell on TOTAL GOVERNMENT CORRUPTION – Exposing The Darkness – Sept. 2, 2026

Excerpt: It’s not just Fauci. The senator says every federal agency has been captured by the very companies they were supposed to regulate.

By [Mariane Angela](#) 31 Aug 2026

Sen. Ron Johnson (R-WI) said Monday that the coronavirus pandemic opened his eyes to the extent of corruption across the federal government.

During Breitbart News’s Fight Club Roundtable with Editor-in-Chief Alexander Marlow and Washington Bureau Chief Matthew Boyle, Johnson was asked about efforts to hold officials accountable for their actions during the pandemic.

“My eyes have been thrown wide open in terms of the capture and corruption of not just our federal health agencies,” Johnson said. “I would say every agency, every department of the federal government is captured by the very businesses and interests that they were designed to regulate.”

Johnson said the problem extends beyond former National Institute of Allergy and Infectious Diseases (NIAID) Director Dr. Anthony Fauci and other federal health officials involved in the pandemic response.

“It’s not just what Fauci and the evildoers inside these federal agencies did. It’s across the board,” he said.

Johnson argued that as the federal government has grown, large businesses have learned to use regulations to their advantage and against smaller competitors.

“They realize, ‘Hey, this ain’t too bad. I can use government. I can use these regulations to my advantage if I’m big enough, if I’ve got enough money,’” Johnson said.

He said that arrangement hurts competitors, customers, and the American public.

THE SILENT CATASTROPHE: Miscarriage Rates Soared from 4% to 30% After Vaccine Rollout, Warns Veteran OB-GYN – Exposing The Darkness – Sept. 4, 2026

Excerpt: While the establishment pushed “safe and effective,” Dr. Kimberly Biss watched pregnancy loss rates octuple in her private practice.

In a devastating testimony, veteran Florida OB-GYN Dr. Kimberly Biss, who has been in practice since 1998, reveals an unprecedented surge in reproductive complications following the rollout of the COVID-19 mRNA injections.

Dr. Biss has been delivering babies for decades, but nothing in her career prepared her for the patterns that emerged after 2021. In 2020, before the shots were introduced, her practice maintained a stable, normal 4% miscarriage rate. It was a banner year for healthy deliveries.

Then came the rollout. With about 65% of her pregnant patients taking the jab (mostly Pfizer), the clinical data shifted dramatically.

- 2021: The monthly miscarriage rate doubled to 8%. In November of that year alone, 8 out of 20 newly registered patients lost their babies.
- 2022: It doubled again to 15–16%.
- Early 2023: The rate skyrocketed to a staggering 30%—a number Dr. Biss had never seen in her 25 years of medicine.

USDA unleashes AI, satellite imaging and other ‘tools’ to monitor American farmers in unprecedented new surveillance program –

Leo Hohmann – Sept. 4, 2026

Excerpt: Announcement comes on heels of USDA deal with AI firm Palantir. ‘Satellite imaging fed into a battlefield intelligence system built by a defense vendor, sold as farmer convenience and food security.’

The Trump administration’s U.S. Department of Agriculture announced this week it is building a government framework that will use technological “tools” including NASA satellite imagery and artificial intelligence to monitor the nation’s farms.

This announcement comes just a few months after another big story in the agriculture world, which I [reported on back in April](#), that the AI data-analysis firm Palantir Technologies has been granted a \$300 million contract with the USDA to collect data on American farmers.

Agriculture Secretary Brooke Rollins said the USDA’s data modernization plan is designed to provide farmers with better and more useful information.

Secretary Rollins unveiled the plan Tuesday, Sept. 1, at the Farm Progress Show. She said it will enhance acreage and yield estimation, stating:

“USDA will expand use of administrative data and improve mobile access. We will conduct a pilot to evaluate the use of improved satellite imagery. Working with NASA and other federal government agencies to figure out how we can make this reporting more accurate.”

Schools Issue Warning About Viral ‘Cat in the Hat’ Trend as Teen Arrested – End Time Headlines – Sept. 2, 2026

Excerpt: Schools across the country are on heightened alert after a disturbing social media craze featuring the Cat in the Hat exploded online, prompting lockdowns, extra patrols, and at least one arrest.

According to a report from Newsweek, a 14-year-old student in Colorado was taken into custody Monday after authorities said he joined the trend by suggesting the familiar Dr. Seuss character would show up outside a middle school and nearby homes.

The posts typically show someone in the tall red-and-white striped hat and black-and-white suit standing motionless on empty roads, peering through windows, or lingering near buildings.

Many carry dark captions that sound like threats. One recent video included the line,

“On my way to Kentucky next, be looking out.” Officials say the images and messages are designed to spread fear rather than harmless fun.

The phenomenon began last month on Snapchat before jumping to other platforms. A single post on X drew more than 10 million views, after which similar clips flooded TikTok. Some videos appear computer-generated. Others cast the character as a lurking predator or serial killer. The wave has drawn comparisons to the 2016 “killer clown” scare that also led to arrests and school threats in Colorado.

In Grand Junction, investigators learned of the local posts on Friday and immediately boosted police presence at West Middle School and Grand Junction High School. No credible plot against students or staff was found. Still, the teenager from Grand Junction High School was charged with harassment and interfering with school operations. He was released to his parents after the arrest.

“The posts are intended to cause alarm and fear in individuals,” the Grand Junction Police Department said. Officials added that they treat every school-safety report seriously and will keep working with partners to protect students and staff. They urged anyone who sees something suspicious to report it immediately.

The same pattern has appeared elsewhere. Laredo police in Texas issued a blunt warning Monday that threatening posts are not a joke and that anyone who posts them can face criminal charges.

“Before you post, think about the consequences,” the department said. “A few seconds on social media can result in a police investigation, school disciplinary action, and potentially serious criminal consequences.”

Several Texas districts increased patrols. In Michigan, Constantine High School went into a precautionary lockdown Friday after accounts tied to the trend named specific students.

The Women Nobody Wants To Talk About In The Transgender Debate – Prophecy News Watch - By PNW Staff - September 05, 2026

Excerpt: For years, one of the most visible consequences of transgender policies has played out in women's sports.

Female athletes have watched biological males enter their competitions, stand on podiums, occupy roster spots and, in some cases, enter spaces once reserved

exclusively for women. Whatever one's position on transgender issues, the conflict has forced society to confront an uncomfortable question: What happens when the interests of people who identify as transgender collide with protections created specifically for women?

But there is another group of women caught in that collision who receive considerably less public attention.

They are women in prison.

And developments in Canada demonstrate why the issue extends far beyond trophies, records and athletic scholarships.

When Inclusion Enters The Prison System

Canada's federal government recently acknowledged in court filings that two transgender inmates housed in women's prisons faced sexual-assault charges following complaints from female prisoners.

The allegations emerged as part of a constitutional challenge to Correctional Service Canada's policy governing "gender diverse" offenders. Plaintiffs challenging the policy have identified 45 female prisoners allegedly affected in 59 incidents of harm involving gender-diverse inmates.

The government's own numbers reveal something else that deserves attention.

Between fiscal years 2017-18 and 2024-25, 57 individuals who were male at birth submitted 129 requests seeking placement or transfer into women's institutions.

Thirty-five requests were approved, 72 were denied and 22 were withdrawn.

As of October 2025, Canada had 90 self-identified transgender women in federal custody.

This is no longer a theoretical discussion about what might someday happen. Prison officials are already being asked repeatedly to decide when someone born male should be permitted to live among incarcerated women.

=====

THE DEPOPULATION AGENDA: Dr. Charles Hoffe on Why They Really Want You Vaccinated – Exposing The Darkness – Sept. 5, 2026

Excerpt: New evidence confirms what many suspected: the mandates were never about stopping a “virus”, but were a deliberate tool for population control.

To the globalist elites, humanity itself is viewed as a virus that must be eliminated.

In this clip, Dr. Charles Hoffe breaks down the disturbing reality of the UN’s Agenda 2030 and the chilling playbook used to enforce it.

Source: [Valerie Anne Smith](#)

Dr. Charles Hoffe exposes the chilling truth behind the UN’s Agenda 2030—a successor to Agenda 21—which aims to reduce the global population to just 500 million.

That’s the elimination of 15 out of every 16 people on Earth.

How? Through coercive medical mandates.

The WHO—a UN subsidiary—has used vaccines to sterilize populations in Brazil, Mexico, India, Kenya, and elsewhere. Now, the COVID shots follow the same playbook:

Pfizer’s biodistribution study showed mRNA particles accumulating in the ovaries, risking permanent female infertility.

Young people were forced to take these shots under threat of losing education, careers, and basic freedoms.

The vaccines never stopped transmission, proving mandates were never about "public health."

This was never a mistake. It was deliberate. History repeats itself.

TOTAL WAR ON HUMANITY: Dr. Daniel Nagase Exposes the Devastating Contamination of the Human Genome – Exposing The Darkness – Sept. 6, 2026

Excerpt: Dr. Daniel Nagase unmaskes the reality of transgenerational biological warfare and the plot to pollute the human bloodline

The consequences of the global genetic injections rollout are becoming impossible to conceal, and the reality is devastating.

Dr. Daniel Nagase warns that foreign, synthetic code has entered human biology with the potential to pass down through reproductive lines, targeting the very fabric of our lineage.

In his own words: “This is the magnitude of the evil we are dealing with. We are dealing with people who have the money the power to pollute the entire human genome. I think because of this we are going to lose about a billion children.”

Satanic elites have set themselves against the natural order, seeking to defile the human blueprint and corrupt God’s creation at the cellular level.

When the ruling class claims the power to tamper with the biological blueprint of humanity, the future of our children is placed in immediate jeopardy.

Share this urgent warning while the truth can still be heard.

The Age Of AI Agents Has Arrived - What Happens When We Give Them Bodies? – Prophecy News Watch - By PNW Staff - September 07, 2026

Excerpt: AI entrepreneur Matt Shumer was in his bedroom when he suddenly heard people talking in his apartment. For a moment, he thought someone might actually be inside.

There was someone talking—but they weren't people.

Shumer, founder and CEO of OthersideAI, had asked OpenAI's new GPT-6 Astra to create a survival world inside Unreal Engine and populate it with human-like characters. Each character was powered by Astra and given the objective of working with the others to survive.

Then something fascinating happened. The agents began talking to each other, discussing tools, helping other characters and coordinating what needed to be done inside their artificial world.

This wasn't proof that AI had become conscious or spontaneously decided to create its own civilization. But the experiment demonstrated something important: AI is moving beyond answering questions and increasingly learning to act.

Welcome To The AGI Era

Just days ago, OpenAI President Greg Brockman used remarkable language to describe what is happening: "Welcome to the AGI era."

Whether today's technology technically qualifies as artificial general intelligence will be debated. But for the average person, there may be a more important development already underway. AI is becoming an agent.

Ask a chatbot, "How do I accomplish this?" and it gives you instructions. Tell an AI agent, "Accomplish this," and increasingly it can use computers and software to pursue the objective itself.

Agents can conduct research, manipulate documents and spreadsheets, navigate websites, write software and carry out multistep workflows. We aren't just building machines that answer us anymore. We are building machines that do things for us.

=====

The Blackout Weapon: Could China Or Russia Turn Off America?

– Prophecy News Watch - By PNW Staff - September 07, 2026

Excerpt: America's enemies do not necessarily have to destroy our cities to cripple the country. They may only need to make those cities stop functioning.

That uncomfortable reality is coming into focus as Iranian-linked hackers threaten attacks against America's energy, water and telecommunications infrastructure, while lawmakers are simultaneously raising alarms about the potentially much larger threat posed by electromagnetic pulse weapons.

The two threats are very different, but they expose the same weakness: modern America is extraordinarily dependent upon interconnected systems, and when one fails, it can begin pulling others down with it.

=====

ZIONISM: THE ABSURDITY OF CALLING JEWISH SELF-DETERMINATION “COLONIALISM” - Frederick Tatala – Sept. 8, 2026

Excerpt: Jews wanted what so many other peoples wanted: a country of their own in their ancestral homeland. Somehow, when Jews did it, it became “colonialism.”

One of the most ridiculous accusations made against Israel today is that Zionism was a colonial movement. It gets repeated so often that people almost stop asking whether it even makes sense. So let’s ask the obvious question: Colonizers for whom?

There was no Jewish empire. There was no Jewish mother country sending Jews abroad to expand its power. There was no distant Jewish government exploiting Palestine and sending the profits home. There wasn’t even a Jewish country. That was the whole point. The Jews were stateless. They had spent centuries living under other governments, depending on other peoples for their safety and learning over and over again what could happen when that protection disappeared.

=====

Israel's Election: Is The Third Temple Moving From Prophecy To Politics? – Prophecy News Watch - By PNW Staff - September 08, 2026

Excerpt: Israel goes to the polls on October 27 in an election that could reshape the country’s government and determine the future direction of the Israeli right.

But buried beneath the familiar election issues is something few would have imagined becoming part of Israel's political conversation:

The Third Temple.

Moshe Feiglin, who has spent decades advocating Jewish sovereignty over the Temple Mount and the eventual rebuilding of the Temple, has just joined forces with Finance Minister Bezalel Smotrich's Religious Zionism party. Feiglin is slated for the No. 2 position on their joint electoral list, and Prime Minister Benjamin Netanyahu has publicly welcomed the alliance.

Then came an extraordinary exchange.

Asked what would happen to the mosque on the Temple Mount when the Third Temple is built, Feiglin didn't dismiss the question as fantasy. Instead, he predicted that Arabs would eventually voluntarily vacate the site and that the nations themselves would want to help Israel build the Temple.

Feiglin acknowledged that this sounds "far-fetched" and impossible under today's conditions. But he pointed to something else that once appeared impossible: the Jewish people returning to their ancient homeland after nearly 2,000 years.

It is an extraordinary prediction.

=====

AI Slop Is Flooding A US Congressional Office That Drafts Legislation – The WinePress – Sept. 8, 2026

Excerpt: Given the errors AI tools generate, the OLC spends “more time trying to fix AI-drafted legislation than it would take for them to draft it from scratch,” the person said.

The following report is from [Politico](#) (excerpts):

Congressional lawyers are struggling to manage a flood of legislative proposals generated using artificial intelligence tools, many of them riddled with errors and shoddy language.

The strain on the House Office of Legislative Counsel is increasing as more congressional offices and outside groups rely on generative AI to draft legislation, according to interviews with eight current and former officials who work or have worked with the office.

They said AI's ability to quickly generate mountains of text is forcing the OLC's lawyers to spend significantly more time reviewing and rewriting the proposals. And in many cases, the drafts are plagued by mistakes that could ripple well beyond Washington —

tying up the passage of legislation and risking lawsuits over erroneously cited statutes or incorrect legal definitions.

“AI is good for a lot of stuff,” said Daniel Schuman, executive director of the nonprofit American Governance Institute, which helps modernize government technology. “But it’s not capable of drafting legislation that you would want to enact into law.”

=====

One Million Moms warns parents against Disney’s ‘Coven Academy’ targeting kids – End Time Headlines – Sept. 7, 2026

Excerpt: One Million Moms is sounding an urgent alarm to parents after Disney unveiled its new teen series “Coven Academy,” a show the conservative advocacy group says is designed to draw children and teenagers into stories of witchcraft and the occult.

According to a report from The Christian Post, the PG-V series is scheduled to premiere Oct. 1 on Freeform, with the remainder of the season beginning to stream the following day on Disney+, Hulu and Freeform on Demand.

In an online alert, One Million Moms charged that the series continues what it described as Disney’s long-running effort to place witches, warlocks and sorcery,

along with secular values, in front of young viewers, especially tweens and teens.

The group labeled the program an original teen drama, or “teen soap opera,” and pointed parents to two biblical warnings against seeking mediums or practicing witchcraft in any form: Isaiah 8:19-22 and Deuteronomy 18:10-11.

The organization said the teaser trailer shows teenagers struggling with anger, a witch sisterhood, teen romance and vampires. It also noted that the trailer is set to Olivia Rodrigo’s song “Brutal,” highlighting that Rodrigo is an outspoken supporter of Planned Parenthood. One Million Moms is urging supporters to sign a pledge declaring they “will not support Disney or ‘Coven Academy’” and to circulate the alert by email and on social media after signing.

=====
