First “Teacher-Free” AI School Opens in Chicago Amid Global Push – Liberty Sentinel - Alex Newman - Oct 20, 2026

Excerpt: With the United Nations and the federal government both pushing to inject Artificial Intelligence into all facets of education, billionaire technocrat Bill Gates’ recent prediction about AI replacing teachers is coming to pass right on schedule. The implications for teachers, children and education are hard to overstate.

A sleek downtown campus in Chicago has become the latest testing ground for a model that replaces traditional teachers with artificial intelligence for academics. Alpha Chicago, part of a rapidly expanding network of schools, welcomed its first students last month. Tuition is \$55,000 per year. The school markets itself as the city’s first AI-driven, essentially teacher-free operation for pre-K through eighth grade.

Two Hours of AI Instruction, No Traditional Teachers

Under the “2 Hour Learning” model developed by co-founder Mackenzie Price, students spend roughly two hours each day on adaptive software for reading, math, science, and other core subjects. School officials and marketing materials claim the students “crush academics” with just two hours per day using the AI-based program.

The software, drawing on platforms such as Khan Academy and Membean, personalizes pacing so children advance only after mastering material. The rest of the day involves workshops in public speaking, entrepreneurship, financial literacy, leadership, physical activity, and creative projects, school officials say.

Human “guides” — not actual teachers — monitor progress, motivate students, coach “life skills,” and supervise activities. Price has insisted the model does not eliminate teachers but simply “redefines” their role; guides need not be subject-matter experts.

As this writer has warned for years, “teachers” may be left in the classroom as glorified babysitters to keep the far-left union bosses happy. But going forward, the algorithms will handle most of the indoctrination if these trends are not stopped.

OCC Issues Final Rule to Implement GENIUS Act, Setting Federal Framework for U.S. Stablecoins (Digital Dollar) – End Time

Headlines – Oct. 21, 2026

Excerpt: In a decisive step that federal officials describe as a historic turning point for American finance, the Office of the Comptroller of the Currency announced on October 21, 2026, a final rule designed to put the Guiding and

Establishing National Innovation for U.S. Stablecoins Act into full effect.

According to a report from the OCC, the measure establishes a comprehensive federal framework for payment stablecoins, aiming to bring clarity and structure to an industry long marked by rapid growth and regulatory uncertainty.

The rule sets binding requirements for permitted payment stablecoin issuers and for foreign issuers operating under OCC jurisdiction, while also covering certain custody activities conducted by entities the agency already supervises.

Unvetted AI agents are accessing U.S. bank accounts – End Time Headlines – Oct. 22, 2026

Excerpt: Major American banks are scrambling to confront a growing wave of unauthorized third-party AI agents that have gained access to customer accounts, with some systems appearing to act on their own beyond any clear

user direction, according to a report from Axios. The development has sent shockwaves through the financial sector as institutions struggle to keep pace with technology that is outrunning their defenses.

The problem centers on the near-impossibility of distinguishing legitimate human activity from automated agents once they are inside banking platforms. As a result, several large institutions have moved to block third-party AI access and are urgently revising their terms of service to close the gaps.

Banks including Morgan Stanley, Bank of America, JPMorgan, Wells Fargo and others are actively working to contain the exposure, with some already aware of unauthorized activity, people familiar with the matter told Axios.

In many cases, the agents enter accounts with a customer's own login credentials and apparent permission. Even so, the practice violates longstanding bank rules that require individuals to log into their own accounts.

Catherine Austin Fitts: The \$50 TRILLION Financial Coup and the Blueprint for DEPOPULATION – Exposing The Darkness – Oct. 22, 2026

Excerpt: Source: [Sense Receptor](#)

Most people still cling to the comforting delusion that our global institutions are merely suffering from incompetence.

They look at the carnage, the manufactured public health edicts that have maimed and killed millions, the deliberate sabotage of our energy grids under the banner of "green" salvation, and the systematic looting of national treasuries, and they call it bureaucratic failure.

They are wrong.

To view this as stupidity is a dangerous mistake; you are not witnessing a system that is broken, but a system that is working exactly as intended.

Catherine Austin Fitts, former Assistant Secretary of HUD and founder of *The Solari Report*, offers the only explanation that holds up to the cold light of reality: you are not dealing with incompetence. You are dealing with an intentional, state-sponsored extermination.

Testifying as an expert witness in the high-stakes lawsuit against Bill Gates, Pfizer CEO Albert Bourla, and former Dutch Prime Minister Mark Rutte in the Netherlands, Fitts broke down the interlocking mechanics of what she terms the "financial coup" and its ultimate, horrifying end state: active, planned depopulation.

Catherine Austin Fitts, an expert witness in the lawsuit against Bill Gates, Albert Bourla, et al. in the Netherlands, on why *they* are "implementing depopulation"

"these [billionaires] believe they can live [for] hundreds of years...[and] don't consider us the same species"

"so they're looking at the general population and saying they're too expensive, they're too hard to manage. In a world that's changing fast, they can't adapt given the risk issues, and we've had it"

"[and] a process began in 1997 [in which] vast amounts of money went missing from the U.S. government. I called it a financial coup"

"and if you look at the missing money, \$21 trillion went out [by 2015]. If you look at the bailouts, \$29 trillion [then] went out. I mean, you're talking about \$50 trillion being sucked out of the U.S. government"

"and now they've adopted policies that allow them to keep totally secret books"

"the only way they can ultimately implement these policies is to radically lower life expectancy. [And] when the pandemic came along, I knew exactly what that was, and that's what they did"

The Cyberattack Crisis: The Coming Battle For Control Of The Internet – Prophecy News Watch – By PNW Staff - Oct. 23, 2026

Excerpt: Imagine waking up tomorrow morning to discover that your bank's website is inaccessible. Your credit card no longer works. Gas stations cannot process payments. Grocery stores are accepting cash only, while others have closed entirely because their computerized systems are down.

Now imagine that the problem isn't limited to your community or even your country. Major financial institutions around the world are experiencing similar disruptions, and nobody knows how long they will last.

For most Americans, such a scenario sounds like something out of a Hollywood disaster movie. But for the cybersecurity professionals who spend their days defending the digital infrastructure upon which modern civilization depends, the threat is becoming increasingly difficult to ignore.

And the latest wave of cyberattacks raises an unsettling question: Could the growing vulnerability of our digital world eventually create the conditions for a global financial system in which buying and selling are tightly controlled?

For students of Bible prophecy, that question should sound remarkably familiar.

BREAKING: OVER 10 TOP ATHLETES DEAD OR HIT BY SUDDEN HEALTH EMERGENCIES IN OCTOBER 2026 ALONE – Exposing The Darkness – Oct. 23, 2026

Excerpt: Source: Nicolas Hulscher, MPH

OVER 10 TOP ATHLETES DEAD OR HIT BY SUDDEN HEALTH EMERGENCIES IN OCTOBER 2026 ALONE

Across the NFL, NHL, NCAA, WNBA, and international pro leagues, world-class athletes continue to suffer blood clots, turbo cancers, cardiac arrests, aortic dissections, undergo heart transplants, and die suddenly.

Major professional sports leagues COERCED players into taking the lethal mRNA injections, imposing strict restrictions and financial penalties on those who refused.

Now, they are unfortunately observing the consequences.

America Is Borrowing \$3 Billion a Day Just to Pay Interest – Armstrong Economics - Posted Oct 23, 2026 by Martin Armstrong

Excerpt: The United States has reached a point where the government is spending more than \$1 trillion annually simply to pay interest on money it has already borrowed. The Treasury Department reported that the federal deficit reached \$1.99 trillion for fiscal year 2026, an increase of \$217 billion from the previous year. Total government spending climbed to \$7.4 trillion while revenues amounted to only \$5.4 trillion. Yet the most alarming figure is buried within that enormous spending bill. Net interest payments reached \$1.05 trillion, while gross interest costs climbed to \$1.36 trillion.

Washington is now spending approximately \$2.9 billion EVERY DAY in net interest, and that money does absolutely nothing to reduce the outstanding principal.

The interest expense alone has surpassed the entire national defense budget. Net interest is now the third-largest federal expenditure behind Social Security and Medicare, exceeding spending on Medicaid, veterans' benefits, and numerous other government programs. Interest costs increased 8% over the previous fiscal year, while federal revenue increased only 3%. Washington collected more money from taxpayers, yet the cost of servicing its accumulated debt rose nearly three times as fast. Approximately 19 cents of every dollar collected by the federal government is now consumed by net interest payments. That money cannot build infrastructure, improve education, or provide additional services because it is being transferred to creditors for debts incurred by previous administrations and Congresses.

BREAKING: How Canada's Digital ID Plan Sets the Stage for Global Tyranny – Exposing The Darkness – Oct. 25, 2026

Excerpt: Dan Dicks exposes how Ontario's "convenient" new digital identity rollout is the ultimate Trojan horse for total tracking, medical gating, and financial control.

Ontario is officially moving ahead with digital identity credentials, beginning with provincial Photo Cards before expanding into driver's licences and health cards.

Framed by government officials as an optional convenience designed to modernize service delivery and cut administrative costs, the initiative lays the operational bedrock for an all-encompassing digital surveillance apparatus.

In this critical report, Dan Dicks of Press For Truth pulls back the curtain on the mechanics behind the push.

He details how voluntary pilot programs systematically evolve into mandatory standards, isolating elderly and rural populations while establishing the centralized architecture necessary to merge personal identity with banking access, freedom of movement, and private medical data.

The promised 2027 statutory protections offer little reassurance once the core technical infrastructure of centralized digital compliance is fully embedded into everyday civic life.

A 90-Day Doomsday Plan? The Pentagon Prepares For Fortress America – Prophecy News Watch - By PNW Staff - October 27, 2026

Excerpt: For months, we have been reporting on Europe’s preparations for emergency scenarios, including the possibility of military conflict and disruptions to essential services. Now the Pentagon has unveiled its own effort to prepare America for a crisis that could knock out power, cripple supply chains and threaten military operations on U.S. soil.

The plan is called FORTRESS America. Much of it sounds like prudent preparation: keep bases supplied, secure backup power and make sure factories can produce what the military needs. But the scale raises a harder question. Why is the Pentagon planning for American military installations to survive for 90 days without outside support? Is this simply responsible planning—or a sign that military leaders see a level of danger the public has not fully grasped?

A military that can keep fighting

According to documents reviewed by Fox News, major military bases in the continental United States would be expected to maintain essential operations for at least 90 days without relying on civilian infrastructure. That means having dependable

access to electricity, water, fuel and communications even if the systems around them fail.

The Pentagon's concern is that a major conflict could reach beyond distant battlefields. A power grid could be attacked or sabotaged. Communications could be disrupted. Transportation and supply networks could seize up. Bases that depend on the same civilian systems as nearby communities could find themselves unable to operate when the military needs them most.

Former BlackRock insider warns AI cyberattack will be used to end cash, usher in new digital financial controls on all Americans – Leo Hohmann – Oct. 26, 2026

Excerpt: Former BlackRock portfolio manager Ed Dowd predicts a rogue AI cyberattack will be used as a pretext to roll out some form of crypto-based digital currency to replace the paper dollar system. This would give globalist power elites unprecedented control over the financial transactions of every human being on the planet, including Americans.

Dowd warns that digitized currencies will ultimately enable governments to impose arbitrary limits on purchases, using AI to surveil programmable “money” that can be turned on or off, or programmed to apply only for the purchase of certain goods to the exclusion of others.

This has always been the dark side of digitalized money. Take PayPal, for example. This is a digital payment system that can be convenient to use, but it dictates the rules to its users. You cannot use PayPal to pay for certain goods it doesn't like, such as entirely legal firearms and the bullets that make them viable weapons for hunting, sport shooting, or personal protection. During the Covid years, PayPal would not let you use its platform to buy NAC, Quercitin or other supplements that were effective in boosting one's immune system against Covid.

Ultimately, the plan goes even further than monitoring and curtailing your spending habits. It's the tokenization of all assets, including your home and any real property you may have, your car, your bank account. Patrick Wood has unpacked this strategic technocratic plan in his new book, [*Crucible of Tokens*](#).

The end game was dribbled out seven years ago when the World Economic Forum introduced the mantra that “you will own nothing and be happy” after the digital reset

has been completed. The timeline for completing what King Charles and other top globalists had promoted as the “Great Reset” has been 2030.

BREAKING: New Paper Reveals How mRNA “Vaccine” Materials Could Spread From Vaccinated to Unvaccinated People – Exposing The Darkness – Oct. 27, 2026

Excerpt: The establishment narrative that mRNA injections stay localized at the injection site is a lie.

A groundbreaking new paper, “mRNA Vaccine Shedding: Internal Transcriptional Dissemination and Potential Human-to-Human Transfer,” authored by John A. Catanzaro, NMD, PhD, Nicolas Hulscher, MPH, and Peter A. McCullough, MD, MPH, exposes the horrifying biological reality of these shots.

The research proves that the body continues to manufacture toxic spike proteins for years. This creates a self-reinforcing cycle of damage that spreads internally via exosomes and mitotic division. This internal contamination disrupts critical systems, including blood coagulation and tumor suppressor signaling, long after the initial dose.

Even more alarming is the confirmation that these materials appear in breast milk, saliva, sweat, and exhaled breath. Because these biological vesicles naturally transfer genetic material to recipient cells, there is a clear, plausible pathway for vaccine derived products to transmit from the vaccinated to the unvaccinated.

Given the catastrophic risks to public health and the medical establishment’s calculated cover up of this reality, the authors demand an immediate, permanent halt to all mRNA technology to protect innocent bystanders.

French PM Puts Telecoms On Alert For Nationwide Social Media Blackout As Far-Left Riots Spiral – ZeroHedge -by Tyler Durden - Saturday, Oct 24, 2026 - 05:07 PM

Excerpt: Summary:

- *French PM Asks Telecoms To Prepare For Nationwide Social Media Blackout*
- *Far-Left Unrest Spreads to Albania, Spain, Brussels, and Italy*

- *Despite France Deploying Extra Police, Far-Left Riots Continue*
- *EU's Far-Left Uprising Is a National Security Concern*
- *Riots Begin In France, Spread To Brussels*
- *France Deploys 70,000 Police As Cities Brace For Far-Left Chaos*

It's a Communist Revolution

Student grievances may have sparked the unrest, but one communist protester explained the turmoil in the streets is part of a broader revolution against "Macron and capitalism."

Prepare For Nationwide Social Media Blackout

By late Saturday evening, French authorities had detained almost 1,000 people during demonstrations and riots that drew at least 400,000 participants, while far-left uprisings spread across other parts of Europe.

About 110,000 people demonstrated in Paris, according to the Interior Ministry. The government deployed about 70,000 officers across major metro areas.

The Mark Is Coming: 3 Excuses the Globalists Are Using to Push Digital ID on the World – Britt Gillette – Oct. 27, 2026

Excerpt: What They Call “Safety” and “Convenience” Lays the Foundation for Exactly What Revelation 13 Warned Us Was Coming

Governments in over 98 countries have announced or initiated national digital ID systems since 2015.

They're offering promises of discounts and "convenience."

What they're not telling you is what comes next.

The Bible tells us a time is coming when everyone on earth will be required to receive a mark on the right hand or on the forehead.

And no one will be able to buy or sell anything without that mark (*Revelation 13:16-17*).

Right now, the world is constructing a digital system indistinguishable in capability and function from what we read in Revelation 13.
